

The USFA Lightning Magazine Rifle

★ 100% American Made ★

Back after 100 years... now you can hunt the buffalo

Produced from 1884 to 1904, the Medium Frame Lightning Magazine Rifle was a dramatic innovation in breach loading firearms. A remarkably short action stroke and compact size, made the Lightning Magazine Rifle a success on the frontier. In the 21st century USFA integrates advances in metallurgy, the precision of CNC machining and the craftsmanship of hand assembly to produce the Lightning today.
